

Case Study

LAVANT HOUSE STABLES

PROJECT
Lavant House Stables

SIZE
Circa 2,500 sq metres

DATE
2015

BUDGET
£100k - £250

Brand new building for British Horse Society approved, Chichester based Riding School .

Scorpion were pleased to be chosen to supply and erect a brand new indoor riding school for Lavant House Riding Stables in Sussex.

Owner and proprietor Lucy Thomson was thrilled with the project which was delivered within budget, timescales, and with minimum disruption to her business. Lucy comments...

"Scorpion Buildings erected our large indoor riding arena for us early in 2016 and from start to finish we were impressed with the efficiency, helpfulness and tidiness of this company.

Our riding school was able to keep functioning throughout, without any disturbance from the construction process and with the work being carried in the first quarter of the

year it was a pleasant surprise at how little landscaping was required upon completion. The Sales Manager, Andy Lawrence, in particular has been a huge help, taking a great deal of trouble to recommend the best and latest products available, which consequently resulted in an end product which is much better than our original expectations."

Lavant House Stables

As a satisfied customer Lucy Thomson is in advanced discussions for additional projects for the very near future. Scorpion very much look forward to again working with Lavant House Stables.
